## 1 **Welcome To My Sticky Notes Version 2.0**

Welcome to My Sticky Notes Version 2.0

My Sticky Notes is a Microsoft Windows desktop application which allows you to create and store any kind of note.

The My Sticky Notes Application Suite consists of two applications:

- My Sticky Notes
- My Sticky Notes Visualizer

## My Sticky Notes

The My Sticky Notes application allows for the creation of one or more notes. Each note can be toggled to stay on top of other running applications or not and has a large range of editing features.

The My Sticky Note is shown below.

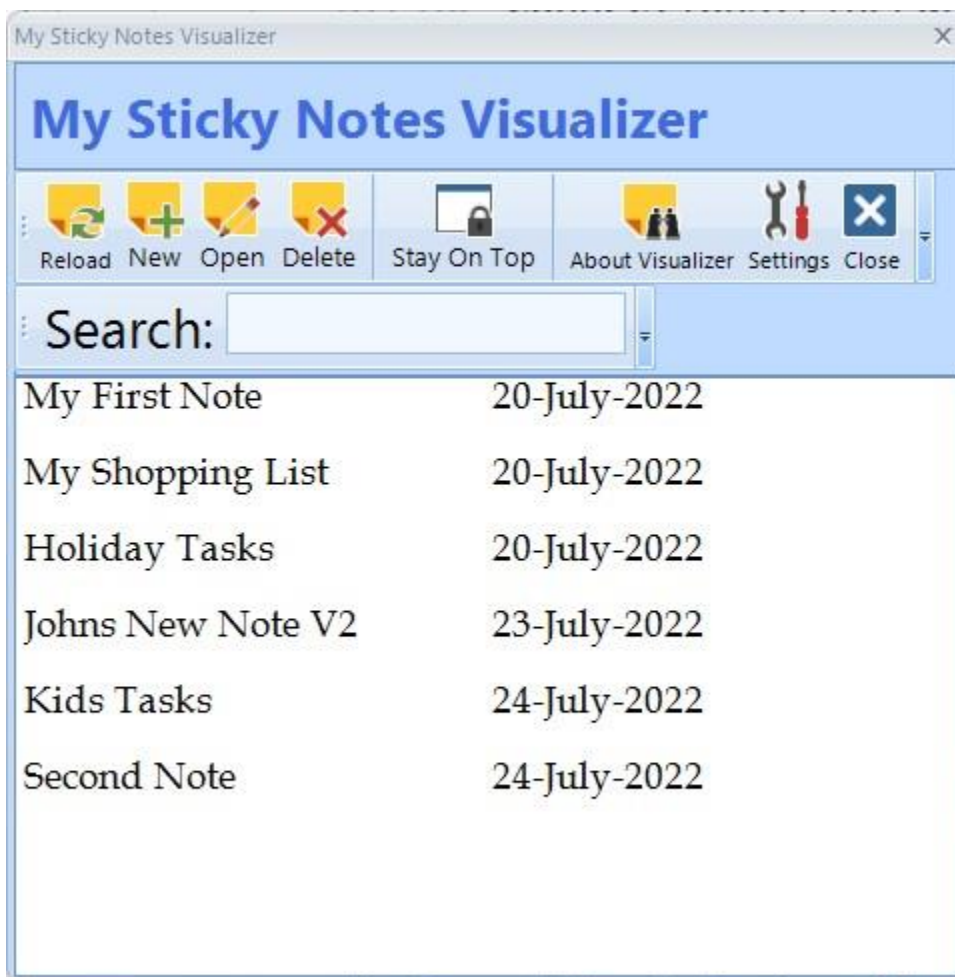

More information about using The My Sticky Notes can be found below

## My Sticky Notes Visualizer

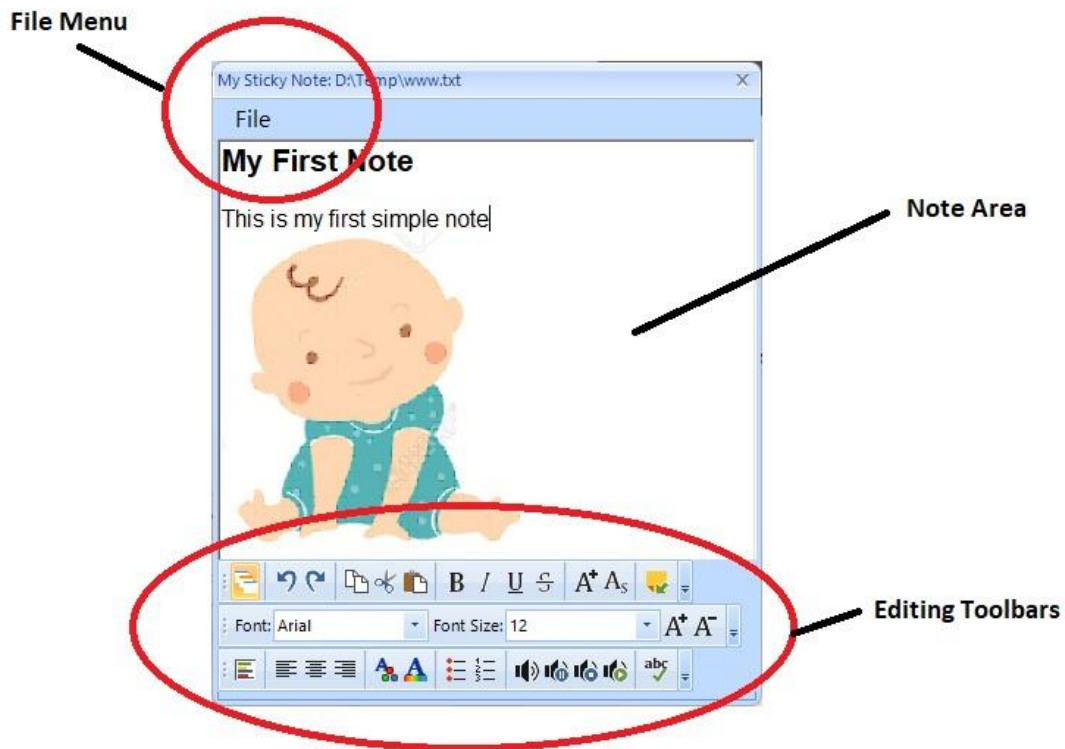

The My Sticky Notes Visualizer allows you to view all your notes from a single place. You can even create new notes and edit and delete existing notes from the application. The My Sticky Notes Visualizer is shown below.

More information about using The My Sticky Notes Visualizer can be found below

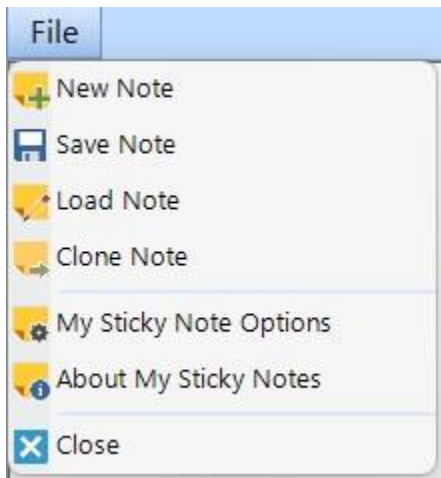

## 2 My Sticky Notes

The different areas of the My Sticky Note are shown in the diagram below.

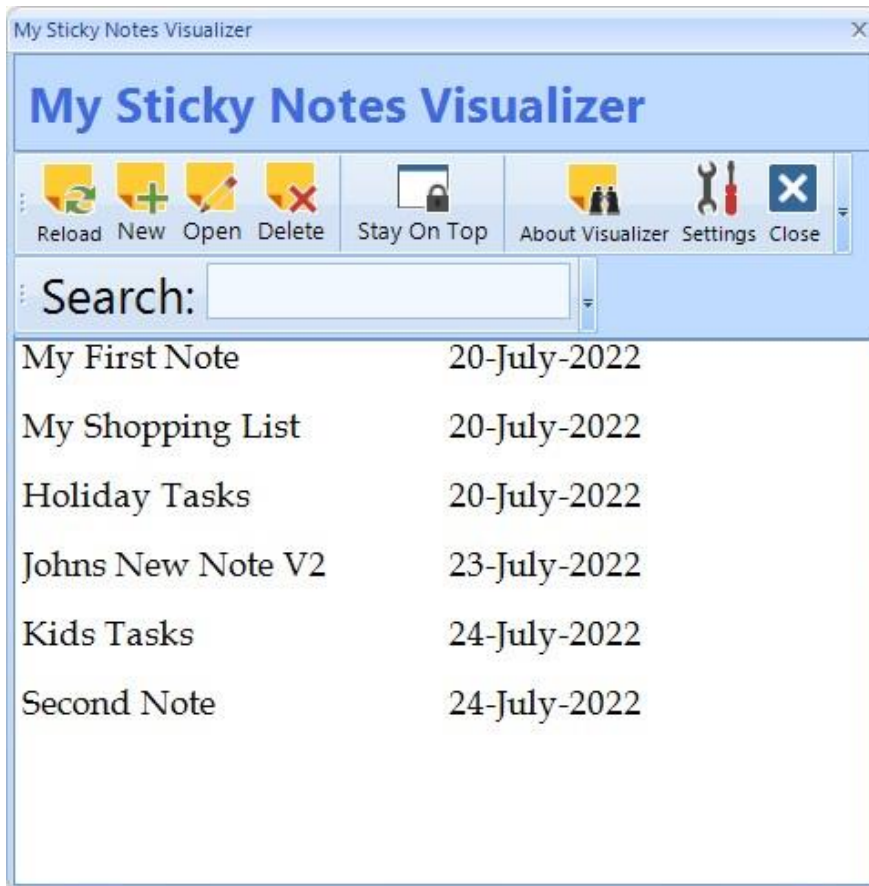

The Editing Toolbars at the bottom of the window provide editing functionality for text editing and alignment, insertion of images and for speech and spell checking.

The File menu is shown below and contains all the functionality relating to Notes and Note management.

## 3 My Sticky Notes Visualizer

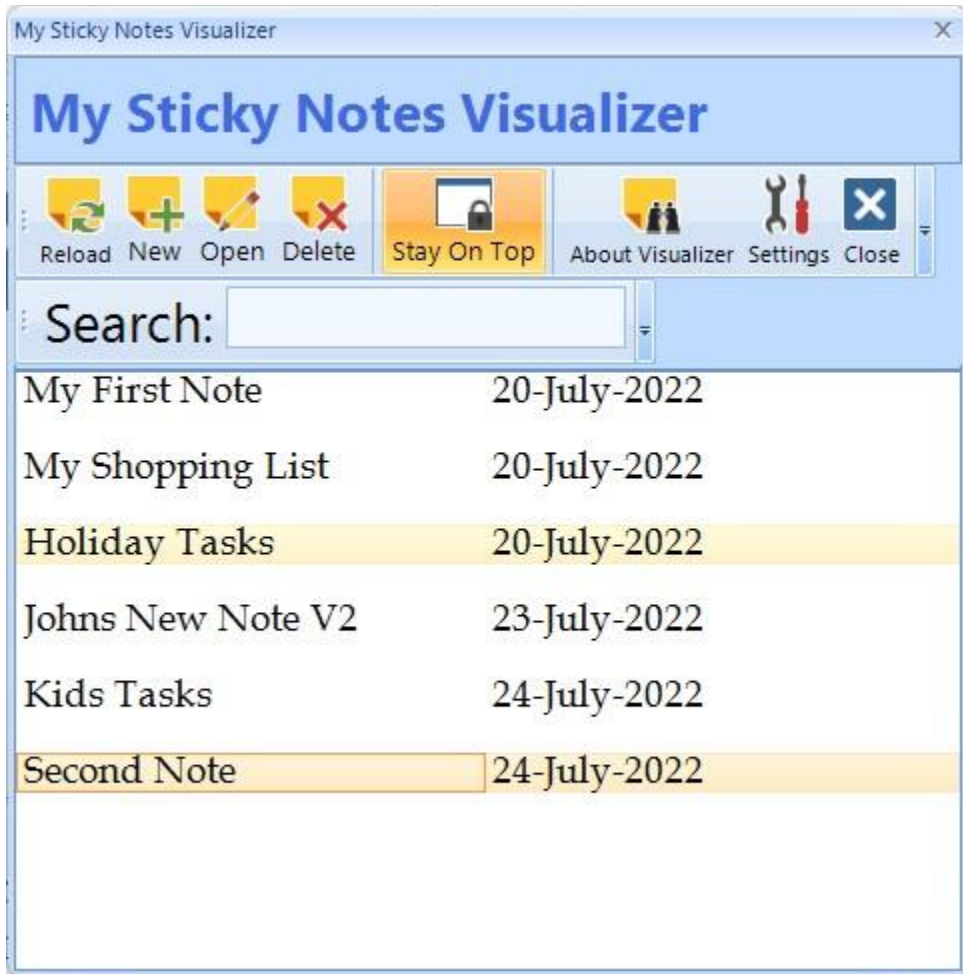

The different areas of the My Sticky Notes Visualizer are shown in the diagram below.

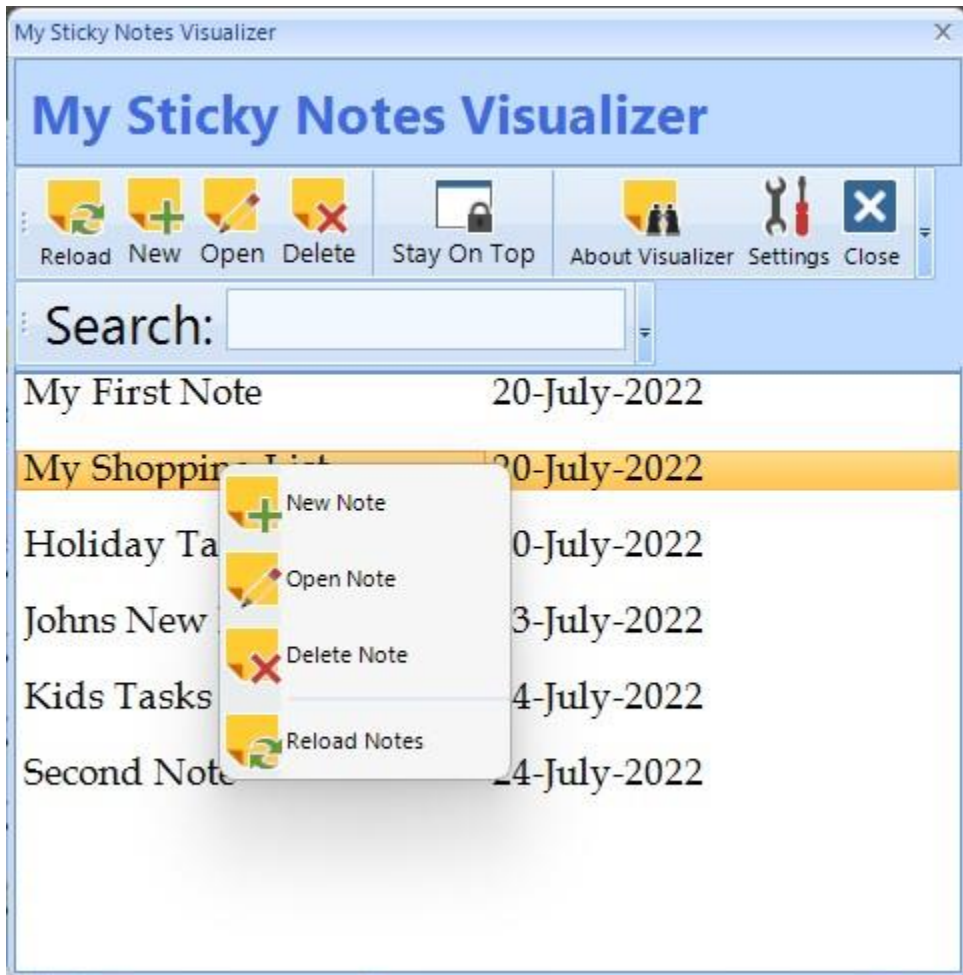

The Stay On Top toggle button allows you to nominate if you want the My Sticky Notes Visualizer to stay on top of all the other application at all times, or whether your happy for it to be moved to the back when other applications are brought forward.

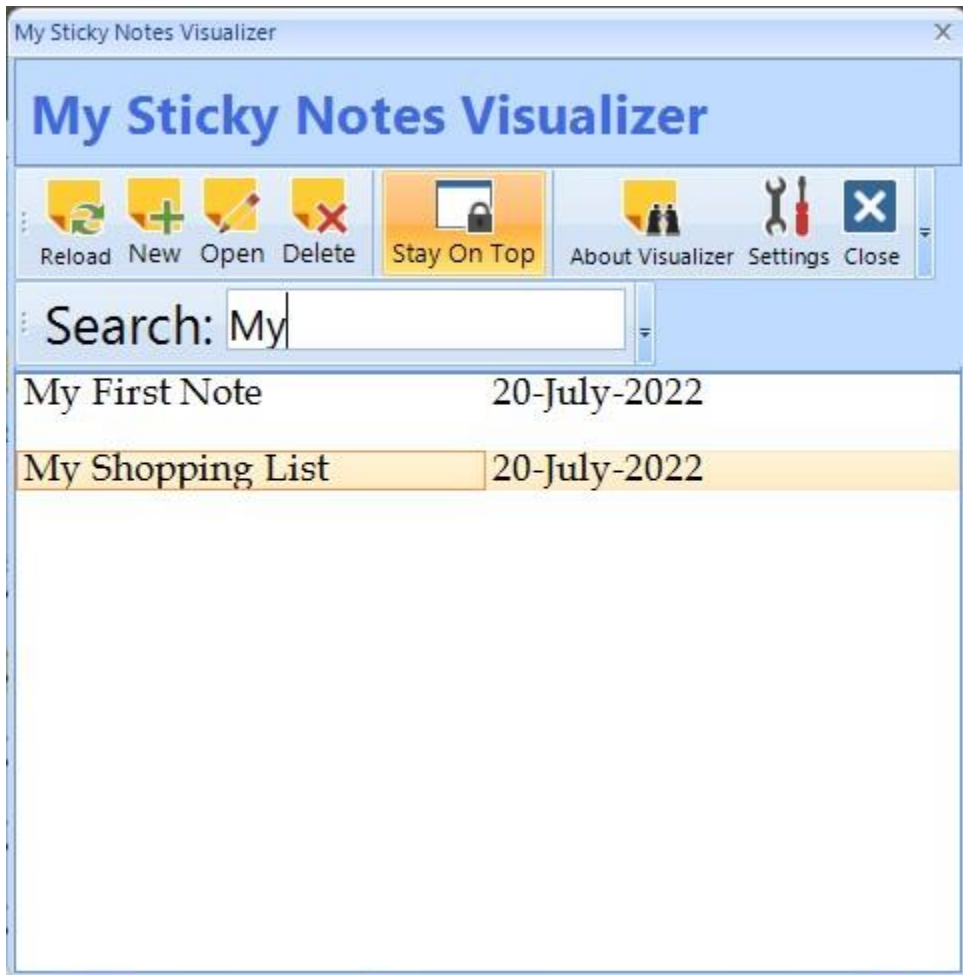

The image below shows the Stay On Top feature turned on (the Stay On Top toggle button is On) and the application will stay on top of all other applications.

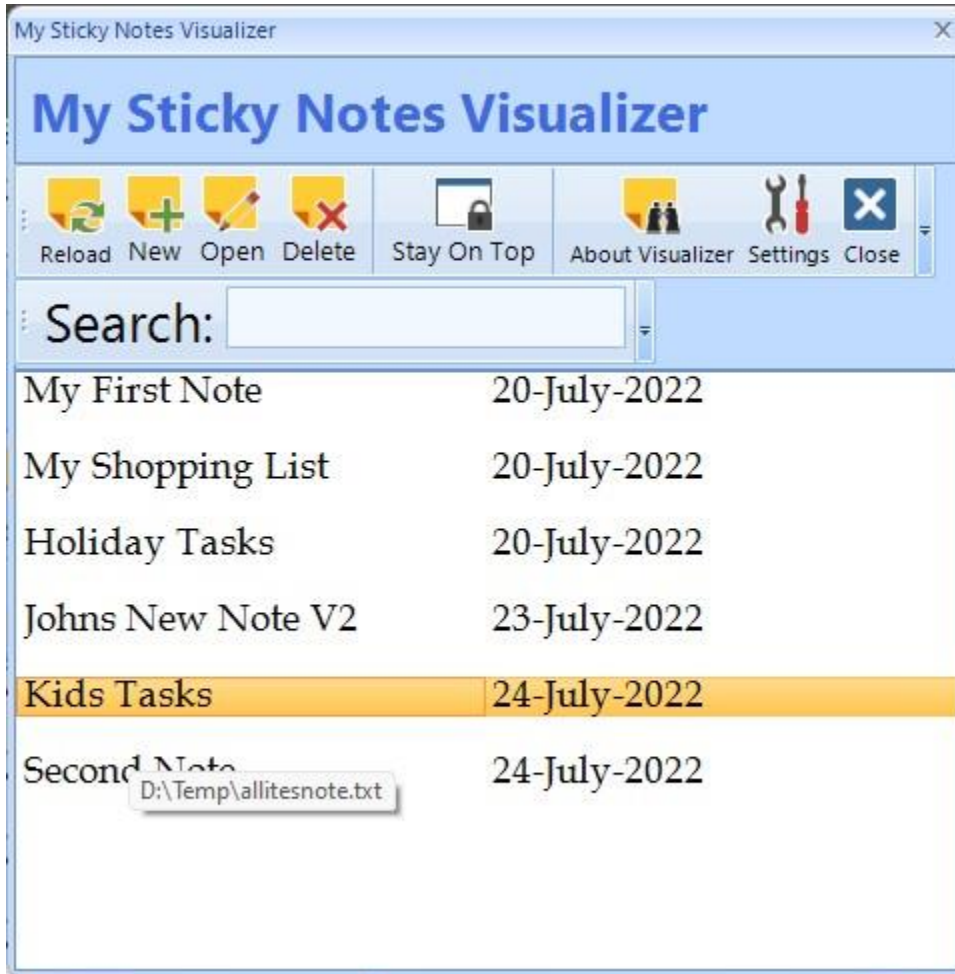

If you select a Note in the notes area and then click the right mouse button a pop-up menu appears. This menu replicates many of the options on the main toolbar and provides a quick way to access these functions.

The Search Box aids you in finding the Notes you are looking for. As you type your search term into the Search Box the note list automatically updates to remove the notes that don't match your search term, as shown below.

If you hover your cursor over a selected note it will display the path and file name of your note, as shown below.

The Settings screen allows you to change the font and font size of the note information shown in the note list. These settings are saved and reapplied the next time you open the My Sticky Notes Visualizer.
